The Terms and Conditions listed below are incorporated by reference and made a part of this contract, unless otherwise limited in the contract, each document applies in its entirety.

In the event of a conflict between the version or date of a clause set forth in this document and the version or date of a clause set forth in the identified Terms and Condition, the version or date of the clauses set forth in this document shall take precedence.

This document includes clauses that flow-down ORNL’s mandatory US Government regulatory and customer obligations as defined in its contract with DOE to manage and operate Oak Ridge National Laboratory, [Contract No. DE-AC05-000R22725](#). To the extent that any clause included in this document is inapplicable to the performance of this contract, the parties shall consider such clauses to be self-deleting and shall not impose any obligations upon the Seller.

This Agreement incorporates certain provisions by reference. These articles and clauses apply as if they were incorporated in their entirety. “Contractor” shall mean Seller; “Government” shall mean Company and/or Government; and “Contracting Officer” shall mean Company’s Procurement Officer

Contractor's Obligations Regarding Data First Produced Under DOE Funding Opportunity Announcement DE-FOA-0000687: Critical Materials Hub

Rights to Protected Data

The Contractor may, with the concurrence of DOE, claim and mark as protected data, any data first produced in the performance of a DOE Work Proposal (FWP) or Inter-entity Work Order (IWO), issued pursuant to the identified Critical Materials Hub FOA (identified FOA) that would have been treated as a trade secret if developed at private expense. Any such claimed "protected data" will be clearly marked with the following Protected Rights Notice, and will be treated in accordance with such Notice, subject to the provisions of paragraphs (b) of this clause.

PROTECTED RIGHTS NOTICE

These protected data were produced under a Field Work Proposal and/or Inter- entity Work Order issued pursuant to Department of Energy Funding Opportunity Announcement DE-FOA-0000687: Critical Materials Hub and may not be published, disseminated, or disclosed to others outside the Government until 5 years after the data is produced, without the express written authorization from the Contractor. Upon expiration of the period of protection set forth in this Notice, the Government shall have unlimited rights in this data. This Notice shall be marked on any reproduction of this data, in whole or in part. "Unlimited rights" means the rights of the Government to use, disclose, reproduce, prepare derivative works, distribute copies to the public, and perform publicly and display publicly, in any manner and for any purpose, and to have or permit others to do so. (End of notice)

Any such marked Protected Data may be disclosed under obligations of confidentiality for the following purposes:

For evaluation purposes under the restriction that the "Protected Data" be retained in confidence and not be further disclosed; or

To subcontractors or other team members performing work under the Government's program of which this award is a part, for information or use in connection with the work performed under their activity, and under the restriction that the Protected Data be retained in confidence and not be further disclosed.

The obligations of confidentiality and restrictions on publication and dissemination shall end for any Protected Data.

At the end of the protected period;

If the data becomes publicly known or available from other sources without a breach of the obligation of confidentiality with respect to the Protected Data;

If the same data is independently developed by someone who did not have access to the Protected Data and such data is made available without obligations of confidentiality; or

If the Contractor disseminates or authorizes another to disseminate such data without obligations of confidentiality.

However, the Contractor agrees that the following types of data are not considered to be protected and shall be provided to the Government without any claim that the data are Protected Data. The parties agree that notwithstanding the following lists of types of data, nothing precludes the Government from seeking delivery of additional data in accordance with the identified FOA, or from making publicly available additional non-protected data, nor does the following list constitute any admission by the Government that technical data not on the list is Protected Data.

Fundamental knowledge of critical materials properties

General information regarding strategy and general overview of projects by or for the Hub directed to reducing or eliminating criticality for existing materials and preventing criticality of new materials that are essential to modern and advanced energy technologies

Identification of and potential function and use of critical materials essential to modern and advanced energy technologies

The Contractor may include this Rights to Protected Data clause, suitably modified to identify the parties, in all subcontracts to any Field Work Proposal and/or Inter-entity Work Order issued pursuant to Department of Energy Funding Opportunity Announcement DE-FOA-0000687: Critical Materials Hub

The Government's sole obligation with respect to any protected data developed under an FWP or IWO issued pursuant to the identified FOA shall be as set forth in this clause.

Unauthorized Marking of Data

Notwithstanding any other provisions concerning inspection or acceptance, if any data developed under an FWP or IWO issued pursuant to the identified FOA bears any restrictive or limiting markings not authorized by this clause, the Contracting Officer has the right to remove,

cancel, correct, or ignore any markings not authorized by this clause on any data furnished hereunder if, in response to a written inquiry by DOE concerning the propriety of the markings, the Contractor fails to respond thereto within 60 days or fails to substantiate the propriety of the markings. In either case DOE will notify the Contractor of the action taken.

It will include the ITER patent and data rights clauses transmitted to the Contractor from the U.S. ITER Project Office, suitably modified to identify the parties, in all subcontracts related to ITER, at any tier, for experimental, developmental, demonstration or research work and in subcontracts in which technical data or computer software is expected to be produced or in subcontracts that contain a requirement for production or delivery of data.
